Projects:

- **this layout only on html and css to see how do I do it:**
<https://sashasobchuk.github.io/verstka-html-css-only/>
- **it's also just layout but here i also used native js :**
<https://sashasobchuk.github.io/verstka1/>
- **here I wrote a game of tic-tac-toe on React:**
<https://sashasobchuk.github.io/tich-tack/>
-
- **here is a simple list of products in columns with the ability to edit**
<https://sashasobchuk.github.io/test.10.04/>
- **on this 'site' i just show how i work with external api data different for each user**
<https://sashasobchuk.github.io/informPage/>

I wrote these on the front and back side, but the server does not always work correctly on free hostings, so they can (here) not display correctly on the front sides also

- **first**
front :<https://sashasobchuk.github.io/tittleSite/>
back <https://github.com/sashasobchuk/ruslana-back.2.0>
- **second**
back :https://sashasobchuk.github.io/myFirsApp/#/Profile_page
back :https://github.com/sashasobchuk/visit-site_server
- **third**
back :https://sashasobchuk.github.io/my-SPA-sosial-network/#/Profile_page
- **fourth**
back :<https://sashasobchuk.github.io/mern-client--page/#/mern-client--page/>
back :<https://github.com/sashasobchuk/mern-server>
